

# **"LAST SUNDAY" at the METHOW VALLEY INTERPRETIVE CENTER**

**Sunday, September 28 at 3 o'clock**

**Local biologist John Crandall has worked on fisheries conservation for many years across the Northwest with a special interest in monitoring fish and habitat response to restoration activities as well as river-riparian interactions. He brings a wealth of knowledge about the native Pacific lamprey, whose life cycle is similar to the salmon and has been an important ceremonial food for Columbia River Native American tribes.**

**Discover how the lamprey  
may influence salmon restoration in our own  
Methow Valley.**

**Free event (donations are appreciated) Located at TwispWorks,  
corner of Hwy 20 and Glover St., Twisp, WA.**

**MVIC and TwispWorks will host a Community Potluck immediately  
following. 997-4904**
